PUBLICATION OF THE NUMBERS IN THIS VOLUME

The six successive numbers in this Volume were issued promptly on the new bi-monthly schedule of publication. See this *Journal*, VI, page iii, and VII, page iii.

ENDOWMENT FUND OF THE JOURNAL OF DENTAL RESEARCH

The urgency of the effort to issue the numbers of the *Journal* promptly on the schedule of publication referred to in the foregoing announcement, and many embarrassments associated with the removal of the editorial office to the new health center, at Broadway and 168th Street have, prevented further effort to increase the Endowment Fund. There have been no important additions since the publication of the report in Volume IV. During 1929, with further reorganization of the editorial office of the *Journal*, special attention will be given to enlargement of the Fund and to reports regarding it in the next volume.

PROCEEDINGS OF AFFILIATED DENTAL SOCIETIES PUBLISHED AS INDEPENDENT JOURNALS WITHIN THE JOURNAL OF DENTAL RESEARCH

The dental societies named on the title page publish their proceedings on conditions that make each society's group of papers, in effect, its own independent journal within the *Journal of Dental Research*. Papers contributed by societies are controlled and edited by the respective associations through their official representatives. Reprints of sections may be obtained for issuance in separate volumes of transactions. The broad import of this development for the cause of non-commercial journalism in dentistry will become apparent as it evolves in successive issues. See the title page of this Volume, and compare it with that of Volumes V, VI, and VII.
